

WiFi NVR Kits

Quick Start Guide

Please read the Quick Start Guide carefully before using the product, and keep it for future reference.

For further information, please visit our website, trivestgroup.com/beepvu

Declaration

Thank you for purchasing our products. If you have any questions or clarifications, please contact us. This manual is for WiFi NVR Kits (wireless NVR & wireless cameras). It is subject to periodic updates at our discretion and new versions may not be specifically obvious.

In the event this manual differs from your product, please contact us for further information/updates.

Safety Precautions

1. Please change default password promptly after equipment installation, to boost the device's security.
2. Please do not place and install the equipment in direct sunlight or near heating equipment.
3. Please do not install the equipment in wet, dusty or soot-producing places.
4. Please keep the NVR level after installation, or install it in a stable place, and take care to prevent the product from falling.
5. Do not drop or splash liquid onto the NVR and ensure that no liquid-filled items are placed on the device to prevent liquid from flowing into the device.
6. Please install the equipment in a well-ventilated place and do not block the vents of the equipment.
7. Please use the equipment within specified input/output range only.
8. Please do not disassemble the equipment without our prior consent.
9. Please transport, use and reserve the equipment in permissible range of humidity and temperature.

Disclaimer

Please pay special attention to the following exclusions or restrictions:

1. If the product is damaged for any of the following reasons, our company shall not be liable for any personal injury or property damage to you or third parties: A. The installation or use of equipment not strictly in accordance with the requirements; B. Maintenance of state or public interests; C. Force Majeure; D. Your own or third-party causes, including but not limited to the use of third-party products, software, components and so on.
2. Our company does not guarantee the equipment for special purposes or use in any express or implied way. This equipment shall not be used for medical/safety equipment or other products which can cause life hazards and personal injury applications or dangerous uses of weapons of mass destruction, biological and chemical weapons, nuclear explosion and any unsafe use of nuclear energy or contrary to humanitarian purposes. Any loss or liability arising from such use shall be borne by you, the user.
3. This equipment may detect specific illegal invasion in correct installation and use, but it can not prevent accidents or personal injury and property loss caused by this. In daily use, please be vigilant and maintain awareness of safety precautions.
4. We are not liable for any consequential, accidental, special or punitive damages, requests, property losses, data losses and documents losses. In the maximum extent permitted by law, our liability for compensation shall not exceed the amount paid by you when purchasing this product.

Products Appearance Description

: Image below shows the ports available on your NVR device. These are WAN (RJ45), LAN (3 ports: 1, 2 & 3), Audio Output Jack, VGA, HDMI, USB, Power input, Antenna.

Note: Images are for guidance only. The actual product may differ in some regards from those shown.

WiFi NVR Kits Quick Installation Guide

This WiFi NVR Kit requires no communication cable, no complex set up, but offers easy plug and play installation, wireless communication using automatic passwords generation mechanism to ensure that the video will be not "tapped" under the default passwords. So use our system with confidence (the codes have been paired: in case the ESSID and passwords are changed, you need to match the codes

1. Install Hard Disk Drive (HDD)

Make sure power is cut to the NVR before installing. Required installation tool: Cross screwdriver.

Notes: Please use only recommended professional surveillance hard disk.

(1) Unscrew the screws on the back and sides of the chassis and remove the cover.

(2) Connect one end of the hard disk power cable and data cable to the motherboard and the other end to the hard disk.

(3) Align the hard disk screw holes to the chassis backplane, and then tighten lock the screws.

(4) Install the cover and fix it by screws.

Note: Images are for guidance only. The actual product may differ in some regards from those shown.

2. Make sure WiFi NVR Kits working well.

Connect NVR to a monitor, and ensure all devices are powered on. Cameras auto-pair with NVR. No complex settings needed. When all the IPC videos appear on the display, the device is working normally and is ready for the next steps.

Note: Please make sure the NVR video output and monitor input have been connected. Please use the matched power supply in the package to prevent the NVR from working improperly or damaging the NVR through the use of a wrong power supply.

Notes: Images are for guidance only. The actual product may differ in some regards from those shown.

3. Adjusting the Antenna:

The NVR antenna transmits signals to the surroundings. When the NVR and the IPC antenna are at the same height and parallel to each other, the communication is optimised. If the NVR can not be the same height, the IPC antenna should be at a tangent to the sphere with the center of the NVR (Figure 2-2). Antenna should not point directly to NVR (Fig 2-1). Follow the figure as guide to optimal placement.

Preview

Enter preview interface after device start up. Preview interface include date and time of system, and channel name. Login to the system, double click to switch between full screen and multi-screen.

Menu basic operating instructions

1. Enter menu mode

Login to system, right click to popup shortcut menu.

Left click **【Menu】** , enter the main menu interface.

Left click **【Playback】** , enter playback operation interface.

Left click **【Record】** , enter record setting operation interface.

2. Exit menu mode

Right click to exit menu mode.

In the menu mode, right click to return to the previous menu (same applies for other menus).

Shortcut menu introduction

Right click to popup shortcut menu, the menu consists with the following three parts:

Preview mode: Select the preview mode in the menu bar you like.

Shortcut menu mode: There are Poll, Record, Add Camera, NVR image, you can click and the enter corresponding menu directly.

Main menu: It contains **【Playback】** , **【Export】** , **【HDD】** , **【Record】** , **【Camera】** , **【Configuration】** , **【Maintenance】** , **【Shutdown】** eight parts.

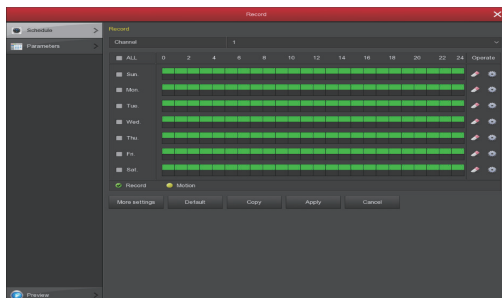

Recording Setting

1. HDD formatting. Make sure the hard disk is detected and works well. (You can check status of HDD from menu option "HDD")

2. Enter "Record" interface to set recording from shortcut menu "Record" or main menu "Record". Default setting is all channels are recorded 24 hours a day.

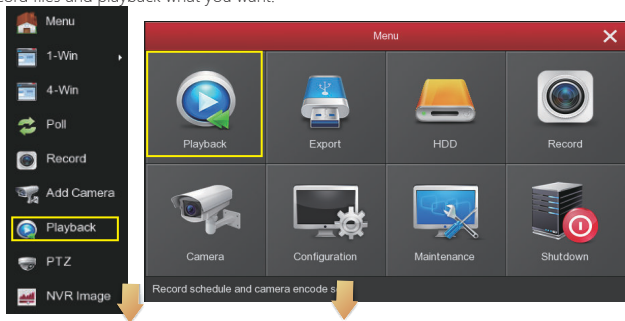

3. Motion Detection Setting, enable "Motion" to activate motion recording, motion sections have no more than 6 time periods each day. If normal record and motion record are overlapped, it can only save the motion recording while motion detection comes up.

Playback

Enter "Playback" interface by clicking "Playback" from shortcut or main menu, select channels and search the record files and playback what you want.

(Video playback Interface)

Note: To improve security, please disable SSID broadcast after the installation is finished. Enter menu "Configuration"->"Network"->"WIFI"->"Advanced", and uncheck "SSID broadcast" on interface you see.

| | |
|----------------|--------------------------|
| Certify mode | WPA2-PSK |
| SSID broadcast | <input type="checkbox"/> |
| Wifi format | 802.11bgn |
| Wifi Channel | Other |

Live View

1. Enter Live View interface by left clicking shortcut menu "1-win" or "4-win". It is available to add single channel or multi-channel on one screen.

2. The default wireless system is factory auto-paired, so no need for any other setting. In case there is no image shown or ESSID and passwords have been changed, please pair the codes first.

Please enter "Add Camera" to pair the codes step by step:

- ① Establish LAN connection with network cable between IPC and NVR.
- ② Delete all the added devices.
- ③ Click "Add" into the Device Search interface, the interface automatically searches for and displays the search for the device.
- ④ Tick all the devices you want to add.
- ⑤ Click "Match code".
- ⑥ Click "Cancel" to return.

PC Side LAN Access

1. NVR LAN login (the PC and the device are in the same router)

① Make sure the recorder and the connected PC (computer) are on the same LAN segment. If not, please set IP address of your PC to be in the same segment as the NVR's. For example "172.136.123.101", but it must be different IP from the NVR's. (Default IP address of NVR is 172.136.123.88).

② Open your browser, select Tools > Internet Options > Safety > customized.

③ Open "Search Tool", double-click the target device from the search result to enter the login interface, or open the browser to enter the NVR address: such as http://172.136.123.80/ (If you changed the port 80 of the NVR, you need to add the changed port) to access the login interface.

④ On login interface, login NVR. (Note: Default user: "admin", password: "12345").

⑤ Webpage live view for NVR. On "Live Video" interface, click "Play" icon to play video.
